I am an individual who integrates her life into her work, eschews the concept of taking holidays, and thrives within the realm of particulars.

© All of the information on the CV is personal information. Private or corporate companies that want to contact me at the contact addresses below They can communicate.

PROFILE

As a frontend engineer and designer specializing in modern web technologies, especially Vue (for web), React Native (for mobile), and GraphQL with headless computing, I deliver innovative, high-performing digital solutions. Designing and coding data sourced from GraphQL or REST APIs using Nuxt.js (Vue.js framework), with a keen consideration for user experience (UI/UX), remains one of the most gratifying pursuits in which I engage.

WORK EXPERIENCE

Front-end Developer 2023 - 2024

UDY Digital (Germany - Hamburg)

Developing software solutions for supermarkets and various startups using Nuxt.js and React Native, working with NestJS and MongoDB databases. Ensuring integration with REST API and JWT, and implementing third-party integrations such as App Store kits.

Open Source Developer 2021 - Present

Self-employed on Github

Collaborating with individuals and organizations in the development of Vue.js projects. Providing assistance across various projects involving Vue.js, GraphQL, Node.js, and related topics.

Front-end Web Developer 2019 - 2023

RECEPOGULLARI TEXTILE A.S

Engaging in the facilitation of integrations between Nebim V3 ERP and various online marketplaces, while also undertaking the design and implementation of the website to meet specified requirements.

Freelance Web Developer 2016 - 2019

Self-employed

Coding enterprise and B2B or B2C e-commerce platforms for businesses, including crafting e-commerce plugins such as virtual payment gateways and comparable solutions within the PHP language for the WordPress ecosystem.

EDUCATION

University of the People 2024 - 2026

Bachelor Degree / Science in Computer Science (BCS)

I'm currently enhancing my skills in software, programming, and technology. I'm proficient in popular languages like Java and Python, and I'm focusing on database management, AI, and machine learning. Building a solid foundation for future career growth and advanced studies in computer science.
